

ViewRanger GPS App – For iphone or itabket

While in Cellphone or Wifi range:

- ViewRanger App needs to be loaded in your device

To upload a GPX Track on your device directly from the Trails BC website:

- Go the Trails BC website <Loops & Journeys>
- Select the Loop you want to do
- Find 'GPS Download / Open in Google Maps'
- Double Click a file that ends in .gpx
- ViewRanger should come up. Allow to load in ViewRager.

To Save an offline Map This step is *not needed* when using <Online maps> while navigating the trail.

Usually used when out of cellphone reception range or not wanting to use online data.

- While on Wifi using the ViewRanger app, go to <options> menu (bottom of screen – tap the screen to get this menu).
- Select <Choose a map>.
- Select <Online maps> and select the suggested <OpenStreetMap(Mapquest)>.
- Go back to <options> menu and go to <Create Saved Map>.
- Map scale – choose <Street> (for greater detail) – a set of tiles over the map shows up.
- Highlight tiles just for the area needed for an activity by touching squares on map. Each map has a maximum of squares possible but more maps can be created depending on how much storage space is on the device. (note: the <select tile> button toggles to a function that allows orienting the map).
- Give the file a name.
- Go to <Download> (bottom left corner of screen).
- Save – this could take quite a bit o time.

Using the selected map and track

- Go to the ViewRanger App.
- From the options menu Go to <Choose a map> and pick either <Online maps> **or** if working offline <maps><Open Street Mapquest><MySaved maps>(may need to scroll down to find <MySavedMaps> and pick the desired saved map <View>.
- Make sure the GPS function is enabled on your instrument.
- To turn the tracking on, tap on the circle on the top right corner.
- Note that the track you want to use will turn red by touching it. A toolbar also comes up to see its properties or to delete it.
- You are ready to go!

Note: For other functions such as deleting and hiding tracks and deleting maps go to the Organizer menu by double clicking on top right corner.
